

Game Concept: “*Within the Leviathan*” (working title)

Story

For sixteen years, the boy has lived within the cold walls of an orphanage.
No memories. No past. No family.

Only fragments remain.

A **voice** he cannot place.

A **face** he cannot fully remember.

And a distant image of a place—an island, small and quiet, surrounded by endless ocean. A place he believes is where he was born... and where his mother once held him.

Driven by a need to uncover the truth, he leaves everything behind and sets sail across the vast ocean.

But these waters are feared.

Old legends speak of something beneath the surface—
something enormous... something alive.

Not a creature you can see.

Not a creature you can understand.

A being so massive it surfaces only rarely, rising from the depths just to breathe.

Most dismiss it as myth.

But he does not know any of it.

The Incident

During his journey, a violent storm tears through the ocean.
Waves rise like mountains. The sky disappears.

And then—something emerges.

Not fully seen. Not fully understood.

Before he can react, everything goes dark.

The Twist

He awakens... **inside it**.

Not a stomach. Not a cave.

But a **living world**.

Flowing rivers of red.

Walls that pulse and breathe.

Strange moving entities—some harmless, some hostile.

He is no longer human-sized.

He is something smaller.

Something insignificant.

👉 Like a **cell inside a body**.

Game World

Inside the Creature

The creature's body becomes an **entire world**:

- **Bloodstreams** → fast-flowing highways
- **Heart chambers** → rhythmic, deadly puzzle zones
- **Lungs** → floating oxygen-rich environments
- **Stomach** → corrosive survival area
- **Neural regions** → electrical, surreal spaces

Each area behaves like a **living ecosystem**.

Gameplay Overview

Core Objective

Escape the creature and return to the real world.

Core Mechanics

- **Flow Navigation**
Ride, resist, or redirect biological currents
 - **Survival Systems**
Oxygen, energy, and environmental hazards
 - **Enemy Encounters**
Immune-like entities, parasites, unknown organisms
 - **Environmental Puzzles**
Open valves, redirect flow, survive organ functions
 - **Exploration**
Discover pathways through interconnected anatomy
-

Conflict & Mystery

- Why was he drawn to the ocean?

- Is this creature connected to his past?
 - Is escaping the goal... or is there something deeper inside?
-

Core Experience

This is not just an escape.

It is:

- A journey through a **living, breathing world**
 - A fight for survival in an **unfamiliar biological system**
 - A mystery tied to identity, origin, and truth
-

Unique Hook

Unlike typical “inside body” stories (like *Fantastic Voyage*),

👉 the player is **not in control of technology**

👉 not on a mission

👉 not prepared

You are:

- Lost
 - Small
 - Trying to survive and understand
-

One-line Pitch

“A boy searching for his past is swallowed by something beyond comprehension—and must navigate a living world from within to find his way back.”

Game 1:

Story of a boy who lived in an orphanage for his whole life of 16 years. He has no memories of his past since he grew up in the house even before he could think. There were no memories except for a voice and an image of a place. A place where he believes he was born and the place where his mother gave him birth. An island not so big, those images only have a faded picture of his mother not good enough to recognise and a subtle picture of the place. An island with xxxxxxxx.

Determined to find his true past he went on a voyage in the great ocean. There were legends that these oceans were no less than a hell, homing an unknown creature. There was no true proof of their existence except the only legends that people have in their stories. They are big. A large creature that is like that of a human. Believed to live under the depths of the great ocean and only rises to surface once every unknown periods to a breath.

He in search of the truth, starts the journey in the great ocean, but a hurricane struck him in his journey, at that moment something from the depths of the ocean rose, it was something one can realise for it was too big to even think what exactly is going on. He now inside this giant creature, a whole new world and life within it, now he must find a way out to escape this place and find his way back to the real world.

A game where a character to was journeying a great ocean in search of his past, got eaten by a mythical creature that is too large to even comprehend, it is as if he is a small cell inside it. Now he needs to find a way back to world, while exploring this human like anatomy of a world and surviving various new monsters.
